

## Safety and Security Window Films: Success Stories

# Department of Energy, Washington, D.C.

“The Department of Energy has to lead by example when it comes to energy conservation. This solar safety window film improved the energy efficiency and interior climate of the building, while also providing an extremely valuable extra safety measure. Employees are more secure knowing that Solar Gard film is constantly hard at work ensuring their safety and comfort.”

The James Forrestal building in Washington, D.C. houses the governing U.S. Department of Energy (DOE). The building is a prime example of energy conservation. Solar Gard film was installed on the building's windows to improve energy efficiency and interior climate. The film also provides an extra safety measure, ensuring the safety and comfort of employees.

### Problem:

- Need for increased energy efficiency
- Lack of glass-related building safety

### Solution:

Solar Gard 8 Mil Silver 35

4' bhagby 2' 80,000 sq. ft. (7,430 sq. meters)

### 5XaX g-

- Significant energy savings
- Strong protection from broken glass
- Reduced heat and glare
- Increased occupant comfort

The Department of Energy gets efficient with Solar Gard® window film.
